

I have been listening to XM radio for about 1 year now. It is great and I love the variety and commercial free nature of the channels. On most FM or AM radio stations, there is more advertising than there is music or useful information like traffic and weather. It is refreshing that XM Satellite Radio contains little or no advertising. The customers of XM Satellite Radio pay for the privilege to listen to these commercial free stations and we should not be restricted from this right.

I respectfully urge you to reject the NAB petition 04-160 and support consumer's rights to purchase a commercial free radio service and the company's right to offer this service.
